ENVIRONMENTAL POLICY**

## Company Environmental Policy

MWI Animal Health UK is an Animal Health company which specialises in the delivery of animal healthcare products and electronic support services to veterinary practises.

MWI Animal Health UK considers the protection of the environment a priority within our business. We acknowledge that our operations have an effect on the environment in terms of the use of raw materials, emissions to air and water, and waste generation. We are committed to implementing Group Environmental Management systems, driving a positive attitude to pollution from any release to air, water or land.

The UK Country Manager has overall responsibility for all matters involving the Environment, this includes the endorsement of this policy and the provision of adequate resources to meet the requirements of this policy and the appointment of Senior Managers to implement, lead and support the implementation of this policy. MWI Animal has appointed a 'Green champion' and this will fall to the EHS Department. Our business is strengthened by protecting the safety, health and environment of our Team members, our customers, and the people of the communities in which we do business.

- Our environmental commitment can be demonstrated in our established objectives and goals below:
- Compliance with all applicable standards, laws, requirements, regulations, and public/customer expectations
- Practicing pollution prevention in order to reduce waste and minimise consumption through electricity and fuel
- Implementing water and energy conservation techniques
- Recycling and reusing materials when possible OR designing out waste through service and goods procurement
- Commitment to sustainable growth by achieving Investors in the Environment accreditation.
- Publishing an annual organisational sustainability report
- Minimising unsustainable transport use through a travel plan
- Working with suppliers to ensure they acknowledge and decrease the environmental impact of their products and transportation

We will continue to improve our environmental management system through annual reviews and updates, taking into account any changes within legislation, our organisation, and other factors. We will convey this policy to all our Team members and make certain that they are provided with proper training to increase awareness of environmental matters.

The EHS Department has a designated responsibility for the day-to-day implementation of this policy.

MWI Animal Health UK will make this policy available when requested to interested parties including members of the public, including making a copy available on the MWI Animal Health website.
