Re: Package Leaflet Error for Panacur 18.75% Oral Paste®

Dear Customer,

I am writing to you to inform you of an error that we have identified on the package leaflet for Panacur 18.75% Oral Paste® Batch E075A04.

Under the section 'Dosage and administration' 'Adult cats and dogs' both the EU Mutual Recognition Procedure (MRP) dose and UK dose are included.

The correct dosage rate which is registered in the UK is "Orally administer 2 syringe graduations per 1 kg bodyweight as a single dose (= 100 mg fenbendazole/kg bodyweight)". The correct dose as stated is printed on the product carton.

Please forward this information to any end users who were supplied with Panacur 18.75% Oral Paste® Batch E075A04 and accept our apology for this error and any inconvenience it may have caused. If you have additional questions, please call us on 01908 685685.

Kind regards,

A handwritten signature in blue ink, appearing to read "N. Barclay".
